PREFACE

The Twenty-third annual volume of the Industrial Arts Index continues with little change the indexing service that has been provided for public, college and special libraries for a number of years. *System* was absorbed by *American Business* in August and from that date *American Business* has been indexed. The *Bulletin of the Taylor Society* and the *Bulletin of the Society of Industrial Engineers* combined as the *Journal of the Society for the Advancement of Management,* the indexing is of course being continued. Other changes of name are indicated in the "List of Periodicals Indexed." To this list there are two additions for 1936: *Electronics* and *Review of Economic Statistics.*

The titles listed monthly in "Recent Book Titles" number for the year 2325, and are included in this volume. These are in addition to the many United States government documents, state geological and engineering bulletins, university bulletins relating to business and technology, and bibliographical bulletins from various sources.
